

LEE ENZYMES DETOX HELP

Podcast Episode #24 – One Supplement That Will Change The World

If you are experiencing
detox side effects while using LEE Enzymes such as:

Acne – Constipation – Rash – Gas

Take ½ teaspoon Celtic Sea Salt dissolved in a glass of water, 2x daily
Drink 12 – 18oz of water to help flush your kidneys of toxins
Also, take extra Magnesium Lactate and/or Colax MediHerb stool softener

**Also, do a coffee enema. Read a patient's
experience:**

"I started taking the Long Life Energy Enzymes about two weeks ago, right before a vacation to Lake Tahoe. I am taking 4 in the morning and 4 before bed. I noticed significant die off symptoms during the first few days but kept at it. After about a week, out of nowhere I developed significant acne on my face, neck, and back. I believe the acne was a result of the LEE supplement working and the fact that I had not done a coffee enema after starting the supplements. As soon as I got home from vacation I did a coffee enema and after 4-5 days my acne is all gone. I wake up earlier in the mornings now and fall asleep easier at night. I don't crave sugars as much and I am happy to be supplementing my pancreas, so it can have a break and heal if it needs to.

Bottom line, if you take a "therapeutic dose," make sure you do a coffee enema once per week or more. These enzymes are great, I will probably buy and use one bottle per year to give my pancreas a temporary vacation (45 days if taking 8 pills per day) for the rest of my life! Thank you Mary and Jack for creating such an amazing product, I love your podcasts too!"

-- Daniel W.

*"This is the most powerful product you'll ever use to help
return your pancreas to its normal, healthy state."*

- Dr. Jack
